

THE EMU MEGATHREAD INDEX

I read the whole of the EMU Megathread, 127 pages at the time of reading (around Oct 2020) *3 cheers for me*. A pleasant read after a purchase of an EMU e6400 Ultra (empty of course) and amidst the time found contained within national lockdown. This serves as a quick reference for anyone who wants the bookmarks or an easy place for a lot of EMU knowledge.

If you would like to go on the same journey and make this document completely redundant, [Start here](#) (OR even better [here](#)) “All things EMU....[That] is the place” - Fanu. This content is not my own work, I’ve just indexed the EMU Megathread that is freely available on DOA for my own enjoyment, learning and documentation – and also added some other resources I found along the way. Not all pages are indexed, just the juicy info I thought would be helpful to bookmark.

I ask one simple thing – share more content on EMU production 😊

Keep the dream alive

I hope you are all well

SCSI DISCUSSIONS

[p.35](#) @Tarelizer - HDD/Scsi2SD upgrade

@milleborne - card: <https://www.itead.cc/scsi2sd.html>

mounting bracket: <https://www.shapeways.com/product/XMF5EE7W8/scsi2sd-v5-bracket>

[p.9](#) @alien_brain – Don't use drives with moving parts because they break easier

BANKS

SAMPLE MEMORY FULL

[p.129](#) Save the bank and start a new one

HARDWARE

RFX32 Card – spenny (£££) & buggy

DWAM board – ASCII Keyboard – Hard to come by these days

SCSI2SD – Best option for internal storage

70mm Internal Fan – The stock one is tish. Put in a quiet 70mm to keep it breezy

GUIs – Don't use them. Get to know your EMU and float around it with ease. Its why you bought hardware after all!!

CHICKEN SYSTEMS TRANSLATOR

TRANSLATOR FROM CHICKEN SYSTEMS

[p130](#) Give it a miss. Apparently a real shit head (what, Garth?? Noo...the software...) but nobody has met Garth, just assuming based on his CS on Gearslutzz?? He's got the only offering though so take it or leave it.

General consensus - Best to avoid the conversions here and stick to file transfers/resampling.
